DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 41-45, drawn to semiconductor substrate, classified in class 257, subclass 288.
- II. Claims 18-40, drawn to a method for manufacturing a semiconductor substrate, classified in class 438, subclass 197+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Group I is different kinds of semiconductor substrates made with trenches however, Group II may use electro-deposition, thermal oxidation, PVD or casting in order to form the semiconductors instead of using epitaxy.
